COMAC Capital Recruitment,

Dear Sir or Madam:

My name is David Rudolf and I am an undergraduate physics student at Imperial College London.

I am writing to you to apply for the Hedge Fund Operations Summer Intern opportunity advertised on the Imperial College careers website. I am interested in this position because I would like to gain experience in trading as I wish to pursue a career in this field. My good problem solving and analytical skills as well as a broad knowledge of languages make me a good candidate for this position.

I am meticulous, hard working and motivated. I have an acute predisposition for detail and I adapt quickly to new environments. Through the study of physics I have gained problem solving and analytical skills that I believe will make me a valuable member of the operations team. I am highly multi-lingual – I speak French, Russian, German and English fluently; I consider this as one of my greatest assets for this position as the financial world is highly international. Furthermore, although I do not have any prior experience in this industry, I have a keen interest in it and therefore I seek to educate myself on the subject by reading several books such as 'An Introduction to global financial markets' and 'An introduction to Derivatives and Risk Management'.

I have a keen interest in this industry and I dream of having the opportunity to experience it first-hand therefore I am kindly asking for your consideration.

Yours Sincerely,

David Rudolf
